

Round nuts 210

Details du produit

Description

This decorative round nut benefits from having a serrated edge providing better grip for hand use and a shoulder which lifts the head clear of the component surface aiding grip.

Advantages

Lightweight, non corrosive, non conductive, with protection and safety considerations.

Qualities

This item has the benefit of good mechanical, electrical and thermal properties being manufactured in black polyamide as standard.

usage

Often used in assembly applications where moving components need to be locked/unlocked
