

Knurled nuts MO / MF

Details du produit

Description

These nuts are available as an open nut, type MO or a closed or cap nut, type MF. They are ideal for hand tightening.

Advantages

Manufactured in white polyamide reinforced with 25% glass fibre for increased strength and durability.

Qualities

Lightweight and non corrosive with all the advantages offered by polyamide (nylon) as the manufactured material.

usage

Ideal for use in applications which only require minimal torque and frequent use.
