

Round nuts

Details du produit

Description

The round nuts are knurled, which allows a quick assembly without tools, so you can screw this nut in places difficult to access with a tool. These are models 280/320/420/620 which correspond to different diameters of these round nuts to choose according to your need.

Advantages

Assembly without tools, very easy and efficient, moreover, this nut is very resistant and stainless.

usage

Often used in industry, aeronautics...
