

Saddle Spacers

Details du produit

Description

Designed mainly for use with tubing, they can also be suitable for pipe work applications. They provide support between a tube and flat surface and if used back to back, between tube and tube. Our range will suit the most commonly used tube dimensions.

Advantages

A perfect solution for many applications involving tubes and pipes.

Qualities

Brings you all the advantages of Polyamide material, light, clean, hard wearing and more.

usage

Any application where tubing is used, especially alongside other materials and components.
