

## Metric hex tapped / threaded spacers

### Details du produit

#### Description

This hexagonal male/female threaded spacer is used to separate and support two components leaving a space between them for insulation and cooling/air flow purposes. It require a threaded fastener to complete the assembly.

#### Advantages

These spacers combine strength and rigidity within a lightweight component. The male thread at on end making installation easy.

#### Qualities

Manufactured in black polyamide as standard, these spacers are also available in black glass fibre reinforced Polyamide (PAGF)

#### usage

Mostly, but not exclusively, used in the electric / electronics industry, or wherever components need to be seperated.
