

# Hollow pins

## Details du produit

### Description

Hollow pins can be used in many applications as an alignment pin, hinge pin, a dowel pin, location pin etc.. With pins in situ, bring two components together accurately prior to screwing together, or securing with adhesives.

### Advantages

Provide a light and invaluable assembly and location aid.

### Qualities

Our hollow pins have all the advantages of Nylon with good mechanical properties and a working temperature range between -30 and +100 C.

### usage

You will find pins in furniture, shelving, machinery and construction, and in general engineering applications.
