

Knurled thumb screws PLAS 82

Details du produit

Description

This PLAS 82 knurled screw is the equivalent, but entirely plastic, of the BPF 82 plastometallic screw. They differ from metal screws by their lightness and their stainless nature and are offered in natural nylon as standard. Without base and fully threaded, they are available in various sizes and lengths.

Advantages

The excellent thermal qualities combined with good mechanical resistance of Polyamide make these screws resistant to impact and friction.

Qualities

Our standard is natural polyamid. Also available in Nylon filled with glass fiber, PP, PE, PVDF, PC, thermoplastics offer another definite advantage over metal: they are not electrically conductive.

usage

Ideal for machine building, tool making, technical plant construction, testing devices and medical devices thanks to their good grip.
