

Hex head screws flanged with 6 lobe drive

Details du produit

Description

This is a fully threaded hex head bolt with a Torx recess / 6 internal lobes that allow high torque application and limit recess wear during tightening.

Advantages

The torx imprint allows for strong and clean tightening.

Qualities

Torx screws are characterized by their recess on the screw head in the form of six-pointed stars. They may be preferred over traditional Phillips screws for their better grip with a wrench.

usage

They are used in particular for automatic screwing. Please note: The finish of each piece may differ according to the reference chosen. Depending on the mold, the surface may be more or less rough. For pearlescent or metallic colors, streaks and color nuances may appear at the weld line. Illustrations are not contractual.
