

Clips STB 160

Details du produit

Description

This clip acts in a similar way to our STB retaining ring but is for lightweight applications where a groove in the shaft is not desirable. It will also work on rigid tubes to hold components in place by providing a clamp like force to the outside diameter

Advantages

Quick and easy to install. Just push on.

Qualities

Provides an interference fit to hold components onto a shaft or tube or similar applications

usage

For use throughout industry where ever shafts and tubes are used to support components.
