

# Washers PEEK

## Details du produit

### Description

These washers are dimensionally close to DIN125. Manufactured in PEEK they have excellent mechanical, chemical, electrical and high temperature performance. In addition to being a lightweight material, PEEK is very strong and is recognised as an efficient metal replacement.

### Advantages

An excellent lightweight alternative to steel giving very high performance in environments, such as temperature and chemical, where other materials are un-suitable.

### Qualities

These washers are tough with excellent mechanical attributes together with flame resistance, and can achieve high flame retardent standards without the need for added flame retardents. Combustibility according to UL 94 V0

### usage

in any environment where high performance and longevity is the requirement.
