

Square hole plugs for tubes

Details du produit

Description

Whether round, square or rectangular, it is a stopper made up of horizontal fins allowing the stopper to be securely held in the tube. They adapt to different wall thicknesses. The cap assembly is easy.

Advantages

Thanks to the ribs , the plug keep in place, it's well positioned in the tube, perfectly matches the shape of the tube for a good hold. These caps are made of Polyethylene and are available in a large choice of colors (standard color: black; gray, white, other colors on request...).

Qualities

Because of its strength, it can also be used as a tip for table legs and various pieces of furniture. Easy fitting of the plug

usage

They provide a perfect finish to metal constructions, furniture and tubular systems. these caps can be used for any type of industry. For all references beginning «BPTF» (shallow model) head thickness is thinner than for «BPT». Illustrations are not contractual.
