

Knurled plug BPE 652

Details du produit

Description

This threaded plug of diameter 15.7 mm protects the tapping thanks to their knurling. It helps for the protection of threaded bores from dirt and external contaminates. It can also be used to close off a lubrication point.

Advantages

Re-usable and easy to use. Suitable for hand tightening with a knurled head to provide grip.

Qualities

This plug is manufactured in polyethylene which offers good resistance to a range of liquids, dilute acids, and chemicals

usage

Can have a number of uses within all industrial sectors. Various thread pitches available
