

# Lamination caps

## Details du produit

### Description

This is a push in plug for the protection of internal threads from dirt build up, particularly during transport and/or storage of components.

### Advantages

Easy to fit and remove, it can also be used as a protective mask during component painting.

### Qualities

Manufactured in polyethylene (PE-LD) which makes these parts resistant to diluted acids, organic acids and some chemicals.

### usage

Protection of internal threads. Please note : The finish of each piece may differ according to the reference chosen. Depending on the mold, the surface may be more or less rough. Illustrations are not contractual.
