

Universal handles

Details du produit

Description

It is a simple rectangular handle with a center distance of 122 mm, i.e. the fixing centers are separated by 122 mm. These handles can be used for drawers as door accessories, usually attached to the outside of a drawer, kitchen sideboard or cabinet. The user can then easily open or pull and close the door or drawer to access the contents inside.

Advantages

These handles are available in several colors on request: in black RAL 9005; in white RAL 9010 , in red RAL 3020, in blue RAL 5015, gray RAL 7035.

Qualities

Our universal polyamide handles provide an attractive and professional look. They are easy to maintain and clean.

usage

These universal handles are designed for all industrial sectors: furniture, medical, electronics, machines, metal construction, etc.
