

# **Knurled nuts BPF 105**

# Details du produit

## **Description**

It is a very strong 20 mm diameter knurled nut, thanks to its nylon head and zinc-plated steel insert. This is the BPF 105 model.

### **Advantages**

The knurled nut allows manual assembly, is very resistant and is anti-corrosive. It does not conduct electricity.

#### **Qualities**

You can screw in by hand, and thus assemble your inaccessible parts with a tool.

#### usage

They are often used in aeronautics, industry and the electrical field  $\dots$
