

Square self-adhesive bumper

Details du produit

Description

These square self-adhesive bumper are differentiated by their pyramidal or thick square shape. Their hardness is shore A - 65°, and are made of polyurethane which gives them this transparent color.

Advantages

The bumpers keep their flexibility thanks to the 200% elasticity.

Qualities

Self-adhesive pyramid bumpers can be used indoors and outdoors.

usage

These bumpers are recommended for heavy objects. The significant thickness provides good shock absorption.
