

Flat star grip BPF 540 (male)

Details du produit

Description

The flat star grip is composed of a black nylon part as well as a zinc-plated steel insert in which a steel screw is inserted. This part allows easy tightening and adjustment of your future assembly.

Advantages

With its larger contact area, this fastener offers larger load bearing and protection for the component surface

Qualities

The head is manufactured in black Polyamide and is resistant to grease and oils, and are hard wearing.

usage

Use for clamping and locking applications on thinner materials. Also used in furniture applications.
