

Volants triangulaires

Details du produit

Description

Il s'agit ici d'un bouton de manœuvre composé une vis en acier zingué et d'une tête en nylon noir triangulaire. On parle de la BPF 195 et BPF 200.

Avantages

Sa forme triangulaire lui permet une bonne prise en main et donc une flexibilité de réglage régulier.

Qualités

Nous recommandons d'utiliser un contre-écrou lors de l'utilisation des vis en fin de filetage (si le serrage n'est pas effectué sous la tête). Tolérance "l" : +/-1 mm.

Utilisation

Souvent utilisé dans l'industrie, l'aéronautique...
