

Viti senza testa DIN 913

Dettagli del prodotto

Descrizione

Si tratta di una vite interamente filettata senza testa, che si caratterizza per la sua testa cava esagonale. La vite senza testa con cava esagonale, detta anche vite di precisione, permette il serraggio del pezzo ma anche la sua regolazione.

Vantaggi

Consente un serraggio preciso di vari pezzi, di cui il suo soprannome di vite di precisione. L'essere senza testa è anche un punto di forza.

Qualità

Il suo incasso esagonale è il risultato della volontà di risolvere due problematiche principali: la resistenza delle viti durante il serraggio e l'accesso a zone strette.

Utilizzo

Viene spesso utilizzata nel settore meccanico e industriale.
