

Rondelle DIN 125

Dettagli del prodotto

Descrizione

La rondella DIN 125/ EN ISO 7089/ DIN 34815 è una rondella piatta senza smusso. La DIN 125, è la rondella in plastica standard più conosciuta a livello internazionale, è proposta standard da Bülte in numerosi materiali : in P.A, in P.A nero, P.E., P.P, PEEK, P.C, PTFE, PVC duro, PVC morbido, POM, PVDF. Tutti questi materiali sapranno rispondere alle vostre diverse esigenze.

Qualità

Sia nella ferramenta metallica che in quella di plastica, la DIN 125 ha dimostrato la sua validità. Il suo punto di forza è la sua autoestinguenza UL 94-V2.

Vantaggi

Oltre ad essere un materiale leggero, il Nylon permette una buona aderenza del dispositivo di fissaggio ed è resistente alla corrosione e alla maggior parte degli acidi diluiti.

Utilizzo

È la rondella solitamente usata in tutti i settori di attività. Collocate tra la testa della vite e il dado, le rondelle DIN 125 impediscono la frizione tra le due parti e distribuiscono la pressione in modo uniforme. Le illustrazioni non sono contrattuali.
